To: All 760 NPA Code Holders and Interested Industry Members (California)

Subject: Industry Planning Conference Call to Plan Relief for 760 NPA

The North American Numbering Plan Administration (NANPA) has scheduled an area code relief-planning meeting via conference call to provide the industry an opportunity to develop an updated relief plan for the California 760 NPA. The 760 NPA is projected to exhaust 4Q2008 at the currently rationed rate. NANPA completed the relief planning process during 1998 and an industry recommended relief plan was submitted to the California Public Utilities Commission (CPUC) in March 1999. The CPUC subsequently ordered a relief plan that was later suspended. The 760 NPA has been in rationing since 1999 and in pooling since 2002. The CPUC – Telecom Staff has requested NANPA to convene an industry relief meeting to develop new alternatives since the previously submitted relief plan is obsolete.

On October 10, 2006, NANPA will be hosting an industry meeting via conference call to develop an updated relief plan for the 760 NPA. The objective of the meeting is to reach consensus among members of the telecommunications industry on a single relief plan for the 760 NPA. The results of this meeting and the industry's recommendations will be forwarded on to the CPUC. We will follow the consensus process, developed in an open industry forum, under the auspices of the Alliance for Telecommunications Industry Solutions (ATIS). An agenda along with an updated Planning Document (PD) for the 760 NPA developed by NANPA is enclosed and will be used to assist the industry with NPA relief planning efforts. Please come prepared to make a decision. NANPA welcomes the submission of other relief alternatives from the industry which will be accepted during the meeting, although advance submission is recommended to allow entities time to review them in advance.

Because the impacts of NPA relief are so significant, NANPA strongly encourages your participation on October 10, 2006. Experience has demonstrated that this could be the only meeting of the industry before a decision is reached on a recommended plan. The details of the relief planning meeting conference call are as follows:

Date: Tuesday, October 10, 2006

Time: 9:30 a.m. Pacific Time (10:30 a.m. MT, 11:30 a.m. CT, 12:30 p.m. ET)

Bridge: (630) 827-6797 Passcode: 8973724 #

CALIFORNIA 760 NPA UPDATED RELIEF PLANNING INDUSTRY MEETING VIA CONFERENCE CALL

October 10, 2006 - 9:30 AM (PT) BRIDGE: (630) 827–6796; PASSCODE: 8973724 #

AGENDA

Welcome, Introductions, Consensus Definition / Statements for the record

Review of 760 NPA Background, History and Status

Review of Updated Planning Document and Proposed Relief Alternatives

New Alternatives from Industry Participants

Discussion of Relief Alternatives

Elimination of Alternatives

Consensus on Relief Alternative and Dialing Plan

Consensus on Implementation Intervals

Set Date to Approve Minutes and Draft Petition to CPUC

Open Discussions

Adjourn

INDUSTRY CONSENSUS PROCESS

1/3/2006

ATIS OPERATING PROCEDURES

VERSION 4.0

7 RESOLUTION PROCESS

7.1 Consensus

Consensus is the method used by the ATIS Forums and Committees to reach resolution of Issues, unless specifically otherwise provided for in these Operating Procedures or in the "ATIS Procedures for the Development of an American National Standard".

Consensus is established when substantial agreement has been reached among those participating in the Issue at hand. Substantial agreement means more than a simple majority, but not necessarily unanimous agreement.

Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution. Under some circumstances, consensus is achieved when the minority no longer wishes to articulate its objection. In other cases, the opinions of the minority should be recorded with the report of the substantial agreement, or consensus, of the majority.

When there are questions or disputes regarding consensus, leaders or participants should ask an objecting participant(s) to state the rationale for the objection and provide an opportunity for full discussion aimed at achieving full understanding and consideration of the objection.

A participant's silence is perceived as agreement by the committee and its leadership. If participants do not agree, they should be encouraged to speak up and voice their opinion.

Alliance for Telecommunications Industry Solutions

Appendix E General Attributes of Common Relief Alternatives

Geographic Splits

Overlays

Concentrated Growth Overlay

• Special and unique monitoring methods, not currently available, are required for exhaust for the area outside of the concentrated overlay, and it is difficult to predict the exhaust of the area outside of the concentrated overlay area.	 Normally, no existing customers will be required to change their telephone number. 	 A concentrated growth overlay minimizes implementation of 10 digit dialing for customers 	 Customer confusion pertaining to dialing for a concentrated overlay could exist.
With an overlay there will be more than one area code in a geographic area. Where the overlay is a new concept some customer education is desirable.	An overlay will not require existing customers to change their area code.	 An overlay requires customers to dial 10 digits (or 1 + 10 digits) for all calls. 	 There is no need to revise stationery, business cards and advertising unless they contain only seven digit phone numbers.
Splits provide a single area code for each geographic area. This may minimize confusion for customers outside the area. Implementation is generally understood.	Splits require an area code change for approximately onehalf of customers in a two-way split, and two-thirds of customers in a three-way split.	Geographic splits permit 7-digit dialing within an area code.	Stationery, business cards and advertising containing a ten-digit phone number will need to be revised by customers receiving the new area code.
•	•	. •	•

• In order to preserve codes, the	nry must be identified as needing relief and the relief plan	needs to be approved much	earlier in order to preserve	enough codes to serve the non-	concentrated overlay area.
An overlay will end further An overlay will end further	of the area code because	subsequent relief will likely be	another overlay.		
Future splits will reduce the	geograping size of the area code.

Relief of California 760 NPA

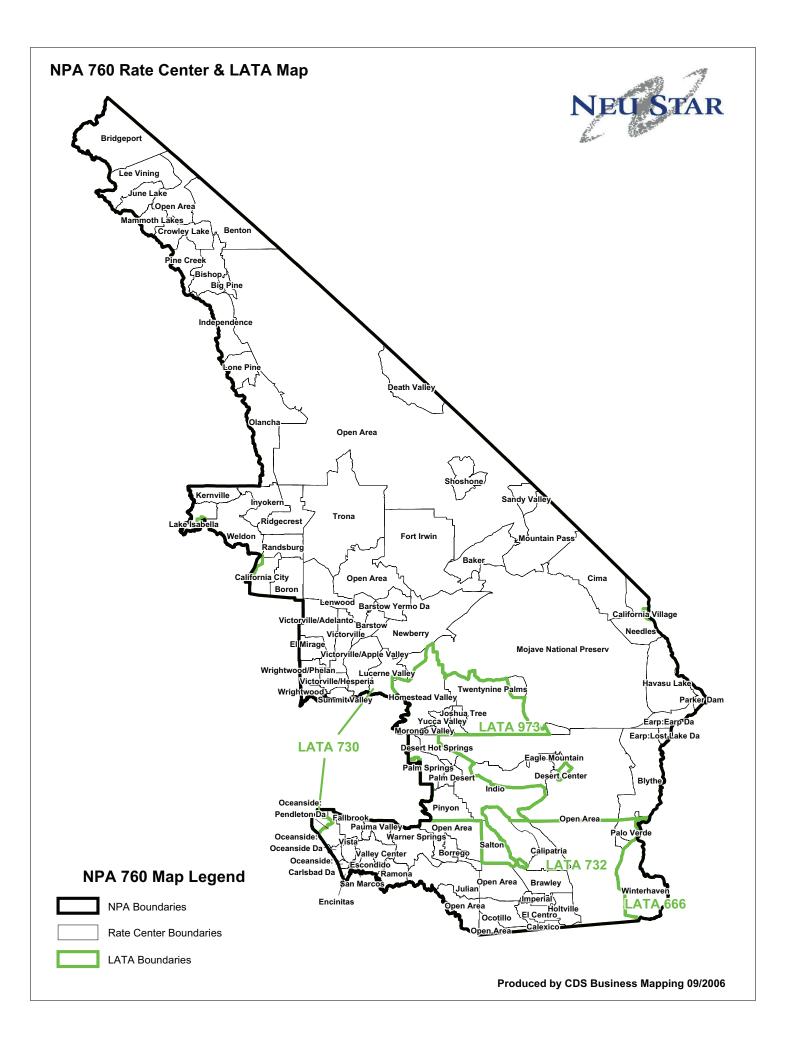

Updated September 2006

North American Numbering Plan Administration

Joseph R. Cocke Sr. NPA Relief Planner

REPORT: STATE ADDS 444,000 IN 2005; 2006 POPULATION NEARS 37.2 MILLION

FOR IMMEDIATE RELEASE: CONTACT: Daniel Sheya (City Estimates)

May 1, 2006 Linda Gage (County & State Estimates)

(916) 323-4086 H.D. Palmer (916) 323-0648

SACRAMENTO— California's population grew in 2005 by 444,000 residents – a 1.2-percent growth rate – to total nearly 37.2 million persons as of January 1, 2006, according to new population estimates released today by the state Department of Finance.

The new report shows preliminary January 2006 population data, as well as revised January 2005 data, for the state, cities, and counties. Highlights include:

California Cities:

- The 2006 report lists 478 California cities, of which 357 gained population, eight experienced no change, and the remaining 113 lost population. Compared to Finance's previous two reports, more cities lost population and fewer cities gained population, reflecting the slowdown in the state's population growth.
- The city of Lincoln in Placer County experienced the state's fastest growth rate at 22.6 percent. Lincoln gained 2,927 housing units primarily from new construction, and now has a total population of 33,589.
- Other fast-growing cities grew because of substantial numbers of new housing units and some
 cities annexed existing housing units as well. These include Beaumont in Riverside County (21.1
 percent), Patterson in Stanislaus County (19.0 percent), Greenfield in Monterey County (15.6
 percent), Temecula and Coachella in Riverside County (14.7 and 13.7 percent respectively), and
 Lathrop in San Joaquin County (13.5 percent). Beaumont, Patterson, Temecula, and Lathrop
 also annexed existing housing units.
- California's largest city—Los Angeles had the largest numeric increase of 41,357. Los Angeles added 12,680 housing units and has a total population of 3,976,071.
- Other large numeric increases include Bakersfield in Kern County (13,979), San Jose in Santa Clara County (12,563), Temecula in Riverside County (12,002), San Diego in San Diego County (10,819), and Irvine in Orange County (10,328).
- Over the last six years since the April 1, 2000 census, the top four fastest growing cities were Lincoln in Placer County (199.8 percent), Murrieta and Beaumont in Riverside County (109.9 and 103.3 percent respectively), and Brentwood in Contra Costa County (96.9 percent).
- Bakersfield in Kern County passed 300,000 in population, giving California 11 cities that exceed 300,000 in population.

California Counties:

- California's fifty-eight counties range in population from 1,241 in Alpine (east of Sacramento on the Nevada border) to over 10.2 million in Los Angeles.
- Compared to the state, twenty-one counties grew more rapidly, thirty-four grew more slowly, and three counties (Alpine, Inyo, and Sierra) experienced minor population decreases.
- The ranking of the state's ten most populated counties is the same since January 2004: Los Angeles, Orange, San Diego, San Bernardino, Riverside, Santa Clara, Alameda, Sacramento, Contra Costa, and Fresno. All but Fresno have over one million residents, Orange and San Diego have over three million each, and Los Angeles County is home to over 10 million people.
- Los Angeles County, the most populous county in the nation, accounts for over twenty-seven
 percent of the state's population. Only seven states have more population than Los Angeles
 County. It is over three times larger than California's second ranked county, Orange. Almost half
 of the state's population resides in four counties: Los Angeles, Orange, San Diego, and San
 Bernardino.
- Most of the ten counties attracting the largest number of new residents in 2005 were also among
 the top ten in total population. In the Bay Area, Alameda and Contra Costa counties, ranked 7th
 and 9th respectively in total population, were not among the state's fastest growers even though
 each county added over 10,000 new residents. In the Central Valley, Kern and San Joaquin
 counties placed in the top ten category for the number of people gained during the year.
- Yuba, Riverside, and Imperial counties each grew by three percent or more during 2005. Kern, Placer, Madera, Colusa, Sutter, Merced, Tulare, and San Bernardino counties had growth rates above two percent.

The annual population change estimates are used by cities, counties, and special districts as a factor in the calculation of their annual appropriations limit. Cities and counties may also have the latest population numbers certified to the State Controller Office for use in the distribution of subvention funds. Other uses include the distribution of transportation funds, the allocation of liquor licenses, and by various state agencies for evaluation and planning.

Changes to the housing stock are used to prepare the annual city population estimates presented in this report. Estimated occupancy of housing units and the number of persons per household further determine population levels. Changes in city housing stocks result from new construction, demolitions, housing unit conversions, and annexations.

A variety of summary administrative records is used to produce the state and county population estimates. Birth and death counts, driver's license address changes, total housing units, school enrollment, federal income tax returns, legal immigration data, Medicare, Medi-Cal, and other data are provided by the responsible federal or state agency. Data are reported in summarized data tables that do not disclose any information about individuals.

Related population estimates reports are available on the Department's website: http://www.dof.ca.gov/ under Demographic Information.

760 NPA Background Information

General Facts:

California became the 31st state on September 9, 1850. It has a population of over 37 million people and encompasses 155,959 square miles. Bordering states are: Arizona and Nevada to the east, Oregon to the north, with the Pacific Ocean to the west and Mexico to the south. The state flower is the California Poppy, the state mineral is gold, the state animal is the California Grizzly Bear and the state bird is the California Quail. California currently has 27 NPAs.

The 760 NPA was created in 1997 when it was split off from the 619 NPA. Today the 760 NPA is in most or all of Mono, Inyo and Imperial Counties and in the eastern portion of Kern County and in the majority of San Bernardino and Riverside Counties as well as the northern portion of San Diego County. A geographical description of the 760 NPA is as follows: the area is basically just east of the Sierra Mountain range starting just north of the Mammoth Lakes and Bridgeport and follows south the eastern border of the state along Nevada and Arizona to the Mexican border and extends westward toward and including Imperial Valley, the northern portion of San Diego County, the Coachella and Lucerne Valleys and the eastern portion of Kern County. Much of this area includes summer and winter recreational areas, desert (Death Valley and the Mojave Desert), government and military lands as well as agricultural areas with low populations. This NPA has several isolated population centers with most of the population and NXX code concentrations in the south in northern San Diego County.

This NPA has concentrated populations in the Victorville, Palm Springs and Oceanside/Escondido areas, with growth areas in the Coachella, Lucerne and Imperial Valleys, plus several military installations including Edwards Air Force Base, the China Lake Naval Weapons Center in and near Ridgecrest, the Army's National Training Center at Fort Irwin, the Marine Corps Combat Center in Twentynine Palms, the Chocolate Mountain Gunnery Range and Camp Pendleton Marine Base. There are also several concentrated Indian Reservations.

Relief Planning Background and Assumptions:

Relief planning was conducted in 1998 and a relief petition was submitted to the CPUC in March 1999. The CPUC previously decided on a geographic split but later suspended this relief plan (see PL #194 & PL #238). NANPA has assigned the new NPA of <u>442</u> for the relief plan.

The 760 NPA was originally declared in jeopardy rationing on February 23, 1999 (see PL-160) and has continued in rationing since then. The rationing level has been adjusted by the CPUC and is currently set at 2 codes per month.

Thousand-Block-Number Pooling started August 2, 2002 in the 760 NPA, which is in LATAs 730, 973, 732 and 666. The 760 is in the following MSAs: Los Angeles, Riverside-San Bernardino-Ontario, Bakersfield and San Diego-Carlsbad-San Marcos.

CO Code Summary:

As of September 15, 2006, the 760 NPA has 717 codes assigned, 42 codes available for the lottery and 23 set-aside codes for the Pooling Administrator for a total of 65 codes available for assignment and 18 Un-Assignable codes: N11s, 442, 555, 570,700,760,853,950,958,959,976. There are 84 rate areas of which 59 are in mandatory pooling plus 3 are mandatory with one service provider, 21 are optional pooling and one is excluded from pooling.

Exhaust Forecast: 4Q2008 (at rationed rate of 2 codes per month)
NRUF Demand Forecast for Next Five Years:
230 Codes, which equates to 46 codes per year; 3.8 codes per month (August 2006 NRUF)

760 NPA Relief Alternatives California

NPA RELIEF PLANNING TOOL ASSUMPTIONS FOR 760 NPA

NRUF Date: August 2006 Projected Exhaust Date: 4Q2008 Annualized CO Code Demand Projection 46 Monthly CO Code Demand Projection 3.8 LERG Data

NPA Relief Alternatives

September 2006

NPA Split Alternatives

The exhausting NPA is split into two geographic areas and a new NPA is assigned to one of the new areas formed by the split and the existing NPA is retained by the other area. All split plans would require 1 plus ten-digit dialing between NPAs in the same manner as exists between other California NPAs. Within an NPA, seven-digit dialing would be permitted. No wireless Codes are grandfathered in these projected lives.

There are 2 previously grandfathered CO Codes assigned to one rate area outside of the 760 NPA. For planning purposes these codes were retained in "Area A" of each of the split alternatives:

SNDG:SNDG rate area NXX codes: 719 and 612 – Wireless service providers Also, the following special service codes are shown in the LERG at SNDG rate area: SNDG:SNDG rate area NXX codes: 853 – Time Service; 570 - HVCI

Alternative # 1 – NPA Split

The proposed boundary line basically follows the San Diego line to the Mexican border. There are 14 rate areas west of the split line in Area B and 70 rate areas east and north of the split line in Area A. This alternative keeps the cities and communities, on both sides of the split line, in tact, and does not split any cities. This is the same split previously ordered by the CPUC.

Area A Area B Total CO Codes = 311Total CO Codes = 405Rate Centers = 70Rate Centers = 14Area code life = 14 years Area code life = 22 years

Alternative # 2 – NPA Split

The split boundary line basically follows the southern borders of the Pinyon and Indio rate centers and then along the eastern borders of the Calipatria, Brawley and Holtville rate centers to the Mexican border. This split retains the rate centers in LATA 732 and also includes the Salton rate center which is in LATA 973. There are 22 rate areas west of the split line in Area B and 62 rate areas east and north of the split line in Area A. The proposed split keeps the northern San

Diego County and Imperial Valley together. This alternative keeps the cities and communities, on both sides of the split line, in tact, and does not split any cities.

Area A
Total CO Codes = 348
Rate Centers = 62
Area code life = 19 years

Area B
Total CO codes = 368
Rate Centers = 22
Area Code life = 16 years

All Services Overlay

An all services overlay requires 1+10 digit dialing for all calls within and between the area code, while existing 760 telephone numbers would not change.

Alternative #3 – All Services Overlay

This alternative is an all services distributed overlay. Customers would retain their current telephone numbers; 1 plus ten-digit dialing by all customers between and within area codes in the area covered by the new area code would be required.

Total CO Codes = 716 Rate Centers = 84 Area code life = 17 years
